

# The Mast™

PSS MOLDED UPRIGHT SYSTEM FOR USE WITH PSS ANCHOR BASE

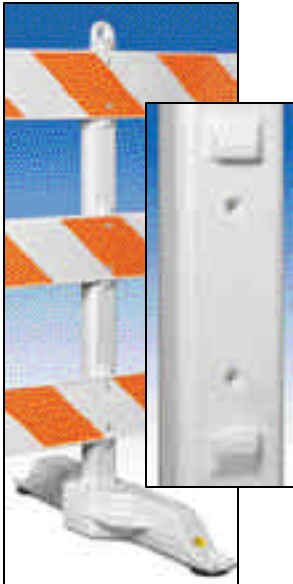

Plastic Safety  
Systems, Inc.

**NCHRP-350 Certified**  
FHWA Acceptance #WZ-61,  
#WZ-102, #WZ-152, #WZ-166,  
#WZ-190 & #WZ-196

## The Mast Features:

- Durable U.V. stabilized prime polyethylene resin
- Uprights meet all applicable MUTCD specifications
- Approved for use with up to 25 sq. ft. of lightweight or roll-up sign material
- Molded through hardware holes for added strength & ease of hardware installation
- Accepts PSS Wave™ molded centerboards, PSS extruded centerboards and most other plastic centerboards on the market
- Recessed hardware holes, when used with The Wave centerboards, allows for the use of flush mount hardware on both the front & back of the barricade system. **This combination significantly reduces reflective sheeting abrasion during transportation!**
- Ability to install a warning light and two flags on each upright
- Raised centerboard locators for easy assembly

**FLUSH MOUNTED HARDWARE KITS**  
are available, please specify board  
mounting application when ordering!

**Each Mast upright accepts a  
warning light and two flags!**
