

The Wave™

High Performance Plastic Barricade Board

Right Board

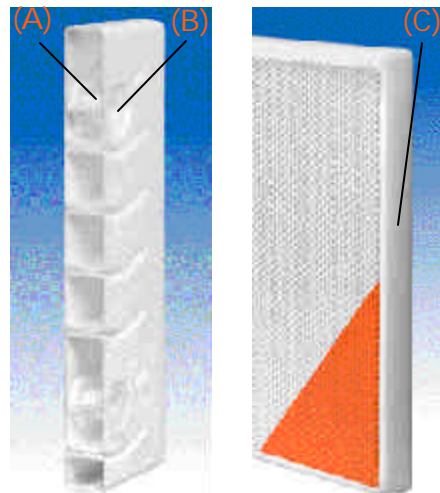

Left Board

Bi-Directional Board

The Wave Features:

- Made of durable U.V. stabilized prime polyethylene with a reinforced structure
- Available in standard lengths of 4ft, 6ft, & 8ft.
- Plastic Barricade Boards can be ordered unsheeted* or sheeted on single side or both sides - Sheeting Grade Options Include: Engineer Grade, High Intensity, or Diamond Grade - SEE BARRICADE BOARD DIRECTION GUIDE BELOW FOR FURTHER SHEETING OPTIONS

The Wave Exclusive Features:

- (A) Molded through hardware holes for added strength & ease of hardware installation.
- (B) Recessed through holes for use with flush mounted hardware protects sheeting.
- (C) Sealed board ends increase strength as well as keep out dirt & moisture.

* To ensure proper sheeting adhesion on plastic substrates, the surface must be cleaned and prepared in accordance to sheeting manufacturer's specifications prior to sheeting application. Plastic Safety Systems offers this value added service to all our customers who purchase sheeted plastic barricade boards. It is our way of ensuring that you, our valued customer, have one of the highest quality and best performing products available on the market today.
